## Experience

2021-03 -  
Current

### Data Engineer

*Wipro Ltd, Hyderabad*

- **Client:** *Chevron ,USA*
- The Project is about to migrate On Premise Client data transformed Data to Azure cloud using Azure cloud services.
- Developing required activities ,setup and testing the application is done by our team.
- **Responsibilities:**
- To migrate customer data from source to destination using tools:
- **Azure Data Factory:** Entire setup of activities like COPY ,GETMETADATA etc. Parameterizing pipelines and Data Flows required as per Business are created.
- **Azure Data Bricks:** Complex transformations which require high cluster configuration like Renaming columns or adding new columns, deleting non required columns, generating new tables, adding new functionality, accessing Error logs etc.
- Running the **Azure DevOps** Pipelines to integrate code into required branches(**dev,test,release**).Besides, changes to the code in the branches are done using **GitBash** in **VisualCode**.
- Testing/debugging the functionality of the built setup of application by manual triggering.
- Verifying the data by querying the associated databases using **MySQL Server**.
- If the activities get failed in Az Data Factory or notebook failed in Azure Data Bricks , sending an customized email through **Azure Logic Apps** to team.
- Monitoring the required pipelines related to the project to make sure they are running successfully .If they don't , need to generate Error logs ,find
